

Unit 2 - Task 3 – SSL module activation and creation of a secure Apache server

Activate SSL module and create a secure Apache server as the class notes indicates. Write a document and describe the steps realized. Moreover, check out the secure connection. Remember the document will be corrected according to the evaluation tool that you have in Moodle. Besides, your document should contain screenshots and the user that you use must identify you. **The document must be written in English with your own words.**

You can use the following link in order to create a secure sever:
